Why Choose **PCS Edventures**?

- **Engaging Experiences:** Hands-on activities and interactive lessons capture students' imaginations and foster a deeper understanding of STEAM concepts.
- **Expert Professional Development & Support:** Our dedicated team provides the guidance and training you need to implement programs with confidence.
- **21st Century Skills Focus:** Our programs equip students with the essential skills – critical thinking, problem-solving, collaboration and communication – that are crucial for success in today's rapidly changing world.

Boost Student Engagement:

Watch as learners blossom into curious and engaged explorers, fostering a love for exploration and knowledge.

Simplify Planning for Multiple Sites:

Forget building curriculum from scratch. Our catalog offers scalable solutions with pre-designed, standards-aligned, STEAM packages tailored for various grade levels.

Streamline Your Workload: Our curated, year-long STEAM Enrichment packages eliminate the guesswork and provide everything you need for a successful program, saving you valuable time searching for and assembling materials.

Our Partners in Learning Share Their Experiences

"Our district purchased kits from Edventures to provide hands-on learning camps for our students during out of school time hours. From brick building to traveling artists to drones, we have found the resources and materials to be user friendly and most importantly, engaging to our students. Quick, easy and ready to use."

—Jennifer Davis, *Expanded Learning Department, Fairfax School District*

"PCS Edventures' STEAM programs were the highlight of summer for many students. Kids were constantly asking, 'When do we get to do STEAM again?' The level of creativity, teamwork, and pure joy was incredible. I saw remarkable confidence and independence in my students as they tried new things, made mistakes, and found solutions. This is the kind of real-world learning we strive for in education."

—Kara Palikij, *Special Ed Teacher, Shoal Creek Elementary*

"Our after-school activity leaders love PCS Edventures STEM kits above all other products simply because they engage students and the step-by-step curriculum makes preparation so easy!"

—Vikki Balet, *Director, Keep Youth Doing Something (KYDS)*
