# **STEAM-Powered Drones**

## **Engineering, Art & Science in Action**

# About Us

- **30+ years** of inspiring innovation in education
- Located in Boise, Idaho
- **7000+ sites worldwide**
- Empowering educators bring interactive, play-based STEAM to students
- STEAM curriculum kits, enrichment camps and full-year STEAM solutions

# Some of our Partnerships

**IDAHO**  
**STEM**  
ACTION CENTER

**U.S. AIR FORCE**  
**J•R•O•T•C**

**TOMORROW**  
**STEMS**  
**FROM IOWA**

**GOVERNOR'S STEM ADVISORY COUNCIL**

*dedicated to building a strong STEM education foundation for all Iowans*

# Presenter: Jan Zatloukal

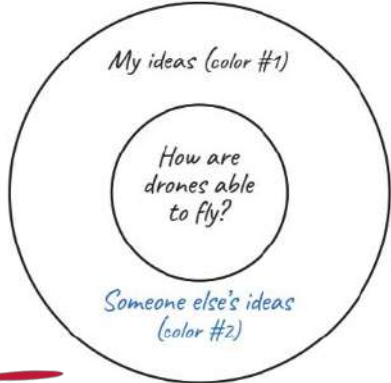

- Instructional Designer at PCS Edventures
- 8+ years as an educator with experience from elementary through high school as well as leading professional development with teachers
- FAA Part 107 commercial drone pilot certification

- Why use Drones for STEAM?
- 3 PCS Edventures drone programs
- Drone Skills Overview - Parts & Controls
- Drone Trivia Game!
- Wrap-Up and Questions
- **Giveaway!!!**

13 *How Are Drones Able to Fly?*

*My ideas (color #1)*

*How are drones able to fly?*

*Someone else's ideas (color #2)*

**What excites you most about using drones in education?**

# Why Drones for STEAM?

- Hands-on learning for real-world application
- Encourages critical thinking, creativity and problem-solving
- Career pathways in STEM fields

# Ready, Set, Drone!

- Learn about drone parts and flight controls.
- Use drones to introduce engineering concepts.
- Learn about the science behind drone flight.
- Simple flight challenges for beginners.

# Drone Designers: Exploring STEAM

- Blend art & coding.
- Use block-based and Python coding for creative flight paths.
- Choreograph light shows & aerial patterns.
- Create costumed drones to enhance storytelling & digital media projects.

# Discover Drones

- Flight physics, problem-solving, teamwork, safety & career exploration.
- Learn to fly on FPV Freerider flight simulator.
- Build, configure and then learn to pilot the RubiQ drone.

# PARTS OF A DRONE

# PROPELLERS

# DRONE CONTROLS

THROTTLE

YAW

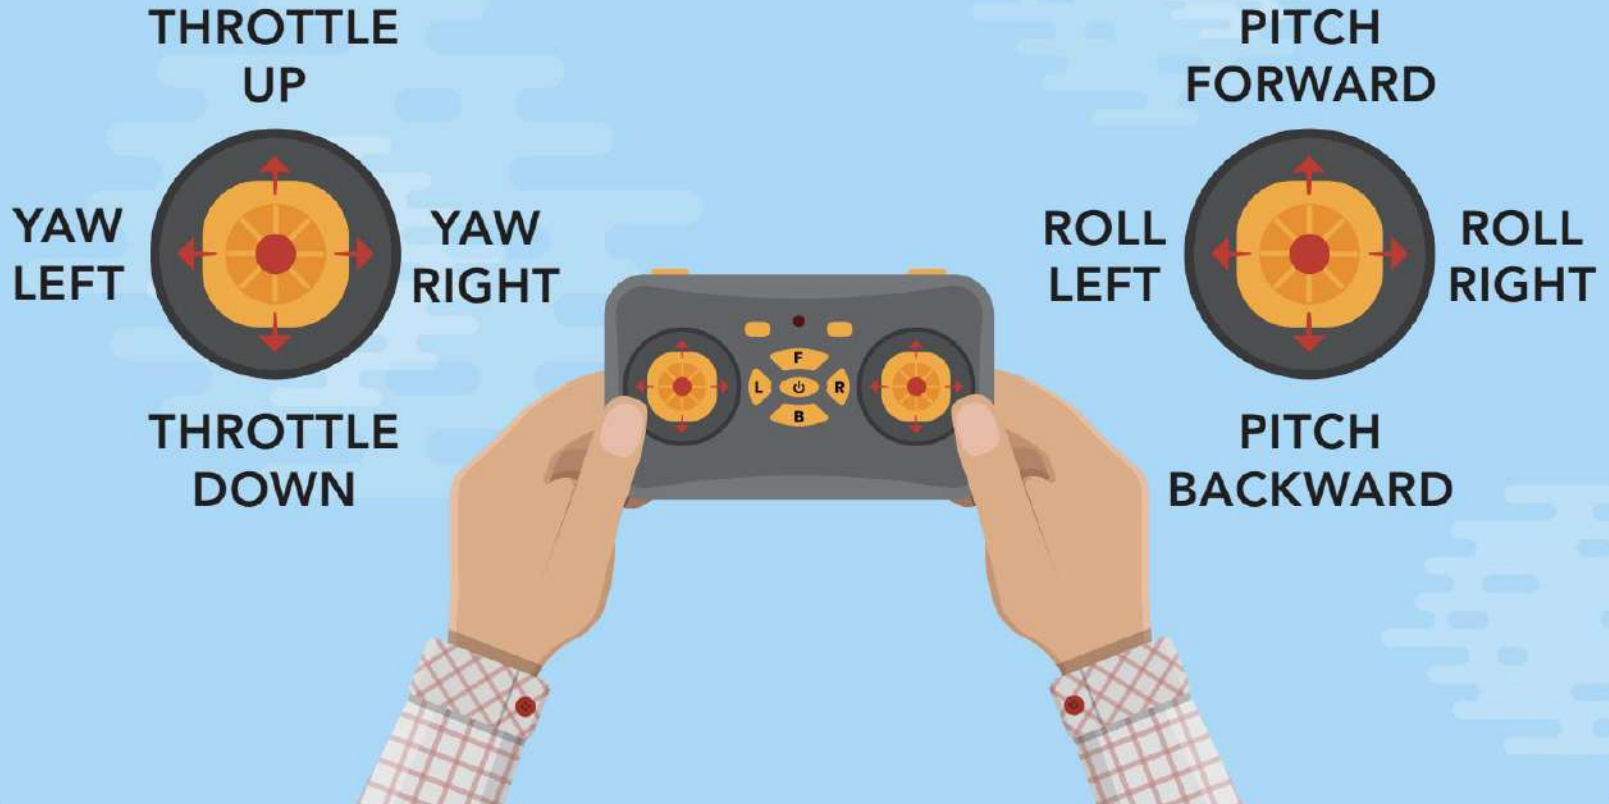

PITCH

ROLL

# RADIO CONTROLS

## Rules:

- Each question has one correct answer.
- **Type your answer in the chat.**
- The first correct answer wins points!
- Our chat moderator will help me track correct answers.
- Every trivia participant will be entered in the giveaway drawing so just have fun!

# Question 1

## What are the four main drone controls?

- A) Throttle, Pitch, Yaw, Roll
- B) Speed, Direction, Lift, Turn
- C) Motor, Propeller, Frame, Sensors
- D) Forward, Backward, Left, Right

00:15

# Question 1

## What are the four main drone controls?

- A) Throttle, Pitch, Yaw, Roll ✓
- B) Speed, Direction, Lift, Turn
- C) Motor, Propeller, Frame, Sensors
- D) Forward, Backward, Left, Right

# Question 2

**What part of a drone protects the propellers?**

- A) Motors
- B) Frame
- C) Prop Guards
- D) Flight Controller

00:15

# Question 2

What part of a drone protects the propellers?

- A) Motors
- B) Frame
- C) Prop Guards
- D) Flight Controller

# Question 3

What happens when you **increase** the throttle?

- A) The drone tilts forward
- B) The drone rotates left or right
- C) The drone moves up
- D) The drone moves backward

00:15

# Question 3

What happens when you **increase** the throttle?

- A) The drone tilts forward
- B) The drone rotates left or right
- C) The drone moves up
- D) The drone moves backward

# Question 4

What control makes a drone **spin left or right** while staying in place?

- A) Roll
- B) Yaw
- C) Pitch
- D) Throttle

00:15

# Question 4

What control makes a drone **spin left or right** while staying in place?

- A) Roll
- B) Yaw
- C) Pitch
- D) Throttle

# Question 5

If you push the **right joystick forward**, what will the drone do?

- A) Move forward
- B) Move backward
- C) Rotate left
- D) Move sideways

00:15

# Question 5

If you push the **right joystick forward**, what will the drone do?

- A) Move forward ✓
- B) Move backward
- C) Rotate left
- D) Move sideways

# Question 6

What does **CCW** stand for in drone propellers?

- A) Clockwise Center Wing
- B) Counter Clockwise
- C) Circular Control Wind
- D) Counter Central Weight

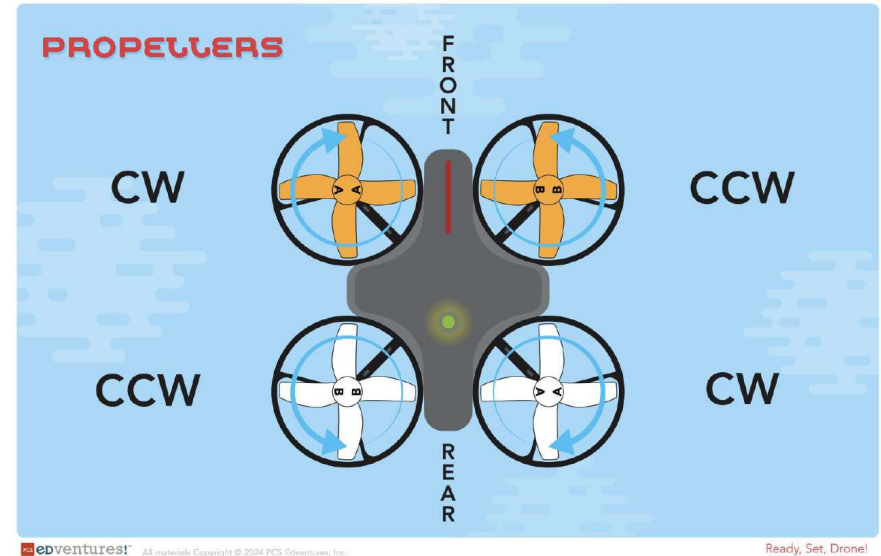

00:15

# Question 6

What does **CCW** stand for in drone propellers?

- A) Clockwise Center Wing
- B) Counter Clockwise ✓
- C) Circular Control Wind
- D) Counter Central Weight

# Bonus Question

What is the function of a **flight controller** inside of a drone?

# Any Questions?
